

# Energy & Environmental Task Force

## Energy & Environmental Initiatives

- Work to develop increased and additional individual and business Energy Tax Credits
- Monitor the LIPA Management Services Agreement bid process to ensure the best deal for LI ratepayers.
- Support the continuation of LIPA as an independent public authority and encourage LIPA to: Retain ownership of the T&D system and keep "energy highway" open for competitive purposes
- Purchase power from the lowest priced competitive provider
- Obtain competitive bids to purchase capacity from alternative energy generating facilities
- Encourage LIPA to build energy efficient ratepayer owned power plants.
- Implement a Certified Organic Farming Program for Long Island Farmers
- Encourage & Promote cost effective alternative Energy Projects
- Study the development of wind and wave turbines on LI
- Support clean, renewable energy
- Address Climate Change
- Improve waste management on LI

**Attend the Next Meeting:**

631-425-2700

The Environmental & Energy Task Force works to provide Long Islanders with safe, reliable and competitive forms of energy and to protect Long Island's natural resources.

**Action Long Island presents:**  
**Long Island Energy Conference:**  
**Exploring LI's Role in the Global Energy Future**

October 2011

Action Long Island will bring together recognized experts in their respective disciplines to discuss, evaluate and decide, based upon the information currently available, a reasonable course of action. The course of action should include establishing a viable path in the direction of renewable energy resources, innovative transportation, and realistic development of industry for Long Island.
